## ABRASIVE DUST SUPPRESSANT

September, 09 Page 1 of 2

### PRODUCT

TARGET PREVENT dust suppressant is a product that represents a major advancement in dust control technology. With this technology, Target Products Ltd is committed to improving the sand-blasting work site and meeting industry requirements. This odorless, colourless material can be incorporated into any abrasive product to dramatically reduce visible and respirable dust generated from blasting operations. When used as part of a comprehensive dust management program, TARGET PREVENT dust suppressant can help blasting contractors comply with more demanding environmental regulations and improve their productivity at the work site.

- Reduces respirable dust by up to 90%.
- Reduces visible dust by 30-40%.
- Remaining dust settles more quickly and closer to the job site.
- Does not affect coating adhesion or life of new paint or coating.
- Long term storage of treated sand or slag does not reduce its effectiveness.
- Carries no special disposal requirements.
- Simplifies compliance with environmental regulations.
- Provides a safe, cleaner work site.
- More convenient handling of abrasives.
- Increased productivity because of better visibility within work area.
- Can be used on a variety of abrasive minerals and other materials.
- Is non-toxic and environmentally safe.

TARGET PREVENT dust suppressant is typically applied in concentrations of 300 ppm, the level indicated in the U.S. Military Specification MIL-A-22262B (SH) to be acceptable, without causing coating adhesion problems. Heavier concentrations, as determined by the manufacturer, can be applied with low risk of coating adhesion problems.
