

# K2-STRIP

October, 04 Page 1 of 2

## PRODUCT

Target Products Ltd. is pleased to announce the introduction of a new media for paint stripping. This new media is a specially produced and sized potassium sulphate crystal called "K2-STRIP". K2-Strip is an odourless, non-volatile, non-flammable and non-controlled substance. No special disposal considerations are required.

## USES AND ADVANTAGES

- It is environmentally friendly.
- It is worker friendly.
- It is water soluble.
- It has a neutral pH level.
- It is non sparking.

Recent tests have shown, when stripping paint off of metal using the same equipment, "K2-STRIP" is between two and three times faster than sodium bicarbonate. These tests were conducted side by side using a SB 400 soda blasting machine with a number 7 nozzle and a 285 compressor. These same tests also conclude that "K2-STRIP" will leave a slightly increased profile without pitting the metal. Although not recommended for use on fiberglass, plastic, aluminum or other soft substrates, this new media will allow for a significant reduction in the time required to remove coating off metals.

Another test concluded that "K2-STRIP" was as fast as #70 grit abrasive for removing paint and, unlike grit abrasives, does so without pitting the metal surface.

## APPLICATIONS

<b>Paint Removal</b> stainless	Removes paint and other coatings from aluminum, steel, glass and chrome.
<b>Clean Parts</b>	Will not damage threads, cast aluminum bearings and seals.
<b>Use in Hazardous Areas</b>	Will not cause thermal sparks.
<b>Inspect Weld Seams</b>	K-2 will not cause crack closure.
<b>Remove Dirt, Residue or Paint from Tank Interiors</b>	K-2 is non-hazardous to workers, even in confined areas. Solubility of media allows for easy cleanup.
<b>Speed Up Turnarounds and Avoid Shutdowns</b>	Other work may continue while K-2 is used.

Product performance is affected by many factors, including storage, method and conditions of application and use. User testing is ESSENTIAL to determine suitability of product for intended method of application and use. Target's SOLE WARRANTY is that the product has been manufactured to specifications. No oral or written information or advice shall increase this warranty or create new warranties. Target's SOLE LIABILITY is to replace product proved defective. In no event shall Target be liable for any consequential, indirect or other damages whether arising from negligence or otherwise.

TARGET is a registered trade-mark of Tegrat Holdings Ltd. Target Products Ltd. is an authorized licensee.

<b>Replace Hand Cleaning</b>	K-2 is faster, reduces manual labour.
<b>Remove Tar Buildup On Asphalt Shingle Equip.</b>	Will not damage bearings or rollers.
<b>Remove Dirt, Barnacles &amp; Paint From Steel Vessels</b>	K-2 will not damage substrate and helps meet containment requirements.

To summarize “K2-STRIP” has several advantages over sodium bicarbonate when used to strip coatings off metal. Some of these advantages include:

- It leaves a slightly increased profile.
- It leaves no hard to remove residue.
- It greatly reduces blasting time.
- It reduces the amount of media required to remove coating(s).

## PHYSICAL PROPERTIES

Specific Gravity	2.66
Density	1363 – 1458 kgs/m <sup>3</sup> ( 85 – 91 lbs/ft <sup>3</sup> )

\* **Correct Air Pressure Is Always Required.**

**K2-STRIP IS EXCLUSIVELY AVAILABLE THROUGH TARGET PRODUCTS LTD**
