

POST HASTE™

FAST SETTING CONCRETE

November, 04 Page 1 of 2

PRODUCT

TARGET® POST HASTE™ is a premixed, bagged product containing accurately weighed Portland cement, admixtures and specially graded coarse and fine aggregates. A non-chloride accelerator is added to give more rapid setting times than for standard concrete mixes.

USES

Because of its rapid setting time, TARGET POST HASTE can be used for all regular concrete applications where a fast set is desired. Typical uses include:

- The installation of fence posts, posts, signs, etc, to gain the benefits of little or no need for bracing and reduced delay before proceeding with construction.
- The construction of slabs, retaining walls, footings, etc, where rapid setting is needed to avoid washout by rain, or in tidal zones.

CAUTION

Although TARGET POST HASTE is a fast setting material, its final strength and abrasion resistance properties are not greater than those of TARGET regular concrete. Where superior salt resistance or strength characteristics are required, consult Target Products Ltd for advice on appropriate products.

TYPICAL PROPERTIES

- When mixed with sufficient water to give an easily placed and trowelable mix (about 75mm or 3 inch slump), TARGET POST HASTE sets in approximately twenty minutes at 20° C (68° F). At this mix consistency, posts set in TARGET POST HASTE are ready for the next phase of construction about ninety minutes after installation. Setting times are longer at lower temperatures, and shorter at higher temperatures.
- Adequately cured TARGET POST HASTE will develop compressive strengths of at least 20 MPa (2,900 psi) after 28 days.

Product performance is affected by many factors, including storage, method and conditions of application and use. User testing is ESSENTIAL to determine suitability of product for intended method of application and use. Target's SOLE WARRANTY is that the product has been manufactured to specifications. No oral or written information or advice shall increase this warranty or create new warranties. Target's SOLE LIABILITY is to replace product proved defective. In no event shall Target be liable for any consequential, indirect or other damages whether arising from negligence or otherwise.

YIELD

The following values can be used for estimating the approximate number of bags of material needed for a project:

ft ³ /bag	0.43
bags/yd ³	63
liters/bag	12.2
bags/m ³	82
