

TOPPING MIX

October, 04 Page 1 of 3

PRODUCT

TARGET® Topping Concrete Mix contains Portland cement, graded sand and chemical admixtures in the proportions required to give an easily mixed and placed topping concrete. All raw materials used in this product meet the requirements of the relevant sections of CSA Standard A23.1-94, *Concrete Materials and Methods of Concrete Construction*, and ASTM C387-87, *Packaged, Dry, Combined Materials for Concrete and Mortar*.

USES

TARGET Topping Concrete Mix is suitable for use in situations where a topping concrete is required in thicknesses from 12mm (1/2 inch) to 50mm (2 inches).

PROCEDURES

1. Remove all dirt, debris and other deleterious material from the surface to which TARGET Topping Concrete is to be applied.
2. Saturate the surface with water before applying the TARGET Topping Concrete Mix, but ensure that no pools of water are present on the surface and allow the surface to become "surface dry" just before placing TARGET Topping Concrete Mix.
3. Mix the required quantity of TARGET Topping Concrete with clean water to obtain the required consistency. DO NOT exceed 4 1/4 liters (7 1/2 pints) of water per bag of TARGET Topping Concrete Mix. DO NOT mix more material than can be placed and finished within two hours.
4. Where bonding is critical, use a bonding slurry containing TARGET Bonding Agent, or add TARGET Bonding Agent to the mixing water. See product data sheets for TARGET Bonding Agent for directions.
5. Place and finish the TARGET Topping Concrete Mix, using standard concreting procedures.
6. After the TARGET Topping Concrete Mix has set, use water sprays, ponding, or damp burlap to keep the concrete wet for at least 48 hours.

Product performance is affected by many factors, including storage, method and conditions of application and use. User testing is ESSENTIAL to determine suitability of product for intended method of application and use. Target's SOLE WARRANTY is that the product has been manufactured to specifications. No oral or written information or advice shall increase this warranty or create new warranties. Target's SOLE LIABILITY is to replace product proved defective. In no event shall Target be liable for any consequential, indirect or other damages whether arising from negligence or otherwise.

CAUTION

- In large areas with thicknesses over 25mm (1 inch) the use of a product containing a larger portion of coarse aggregate could be desirable. Contact Target Products Ltd for advice on suitable products and procedures.
- In large areas, "curling" of edges can occur if adequate bonding of the TARGET Topping Concrete to the substrate is not obtained. Contact Target Products Ltd for advice on bonding procedures.

Do not place TARGET Topping Concrete if the temperature of the mix, or the surface to which it is to be applied, is less than 5 °C (41 °F) or more than 35 °C (95 °F). Protect the TARGET Topping Concrete for the first 72 hours from temperatures outside this range after placing.

YIELD

At a thickness of 50mm (2 inches), each bag of TARGET Topping Concrete Mix will cover approximately 0.25 m² (2.7 ft²). For larger areas the following approximate yield data can be used for estimating quantities:

liters/bag	12.8	bags/m ³	78
ft ³ /bag	0.45	bags/yd ³	60
