

CHLOR*TEST "CSN"™

June, 2019 Page 1 of 1

PRODUCT

CHLOR*TEST "CSN"™ is used for testing salt contamination. It is the most accurate field test on the market today.

Most specifications do not address sulfates or nitrates because there has never been a sulfate or nitrate field test kit. Now there is a complete test kit available that tests all three salts.

CHLOR*TEST "CSN Salts" offers the specifier the availability of trouble-free performance testing, in the field, for chlorides, sulfates, and nitrates with one extraction.

The CHLOR*TEST "CSN Salts" uses a unique patented extract solution, CHLOR*EXTRACT, to retrieve surface salt contamination. This special extract enhances retrieval rates, thereby increasing accuracy. The greater the retrieval rate, the more accurate the test results.

Surface sampling is simplified by use of the patented CHLOR*SLEEVE®. Sampling can be done overhead, vertically, horizontally or any angle with this device.

INNOVATIVE FEATURES

- Cross contamination is eliminated with one time use components.
- All test results are measured directly in parts per million. No conversion charts are needed.
- Parts per million readings are 1 to 1 ratio to micrograms per square centimeter. No mathematical calculations are necessary.

RECOMMENDED FOR SURFACE TESTING ON:

- Mining Facilities
- Ships
- Marine Structures
- Storage Tanks
- Cooling Towers
- Pipe Lines
- Power Plants
- Offshore Rigs
- Petrochemical Plants
- Pulp and Paper Mills
- Steel Fabrication
- Electronics

The World's most complete "salt" field test kit for surfaces.

PACKAGING

Target Products Ltd. distributes the test kit and the refill.

9992262 CHLOR*TEST, CSN - Salts / 5 Test

9992263 CHLOR*TEST, CSN - Salts Refill

NOTICE: Obtain the applicable **LIMITED WARRANTY** at www.targetproducts.com/product-warranty
Or send a written request to Target Products Ltd., Five Concourse Parkway, Atlanta, GA 30328, USA.
