Along with our Premium Topdressing Sand we offer custom blends of specific amendments into the Topdressing Sand according to the individual turf needs of each golf course. Target's ability to custom blend provides golf course managers with complete control over all aspects of their turf management program.

## Benefits of Blended Products

### Amendment variety

Target offers all types of soil amendments: Axis, K-mag, Calcium, Peat, Organic (hpss) etc.

### No labor cost

The labor-intensive practice of hand mixing topdressing additives is completely eliminated.

### Mix consistency

Using precise measurement and mechanical blending machinery, consistency is guaranteed.

### Construction projects

Target custom blends and / or screens on site to specific root zone requirements for new construction. Local sand deposits may be used when available.

All custom blended topdressing sands from Target undergo strict quality testing including particle size distribution, amendment ratios, hydraulic conductivity, pH levels and capillary porosity of the mix. USGA standards and Thomas Turf specifications combined with Target's years of blending experience provide superior products and customer service.
