

DRY GREENS TOPDRESSING SAND

June, 2019 Page 1 of 1

Target Products Ltd. is pleased to introduce our new dry premium greens topdressing sand. This new trend in greens maintenance is superior to conventional wet sand application in many ways.

Benefits to using dried versus wet topdressing sands:

- **Application to greens**
- Reduced man-hours for applying and matting in topdressing, allowing for multiple applications. Ability to top dress in cloudy or rainy weather.
- **Custom blends available**
- Target can pre-blend various soil amendments into topdressing before delivery.
- **No stock contamination**
- Sand comes from delivery truck directly into silo then to application equipment without touching the ground.
- **Low impact on putting surface**
- Minimal or no matting required on standard application of dry topdressing. Sand
- **Playability is not affected**
- Sand spreads directly to the crown minimizing playability effect and stoppage of play.

Target is dedicated to providing high quality products while maintaining very competitive prices. All premium topdressing sands from Target undergo strict quality testing including particle size distribution, hydraulic conductivity and pH levels.

PACKAGING

Topdressing is available in 25 kg (55 lb) paper bags, packaged 32 per pallet or in bulk bags of approximately 1000 kg (3968 lb) each, packaged 1 per pallet. Bulk deliveries by pneumatic tank trucks are also available.
