

# K2-STRIP

## PRODUCT

Target Products Ltd. is pleased to announce the introduction of a new media for paint stripping. This new media is a specially produced and sized potassium sulphate crystal called "K2-STRIP". K2-Strip is an odourless, non-volatile, non-flammable and non-controlled substance. No special disposal considerations are required.

## USES AND ADVANTAGES

- It is environmentally friendly.
- It is worker friendly.
- It is water soluble.
- It has a neutral pH level.
- It is non sparking.

Recent tests have shown, when stripping paint off of metal using the same equipment, "K2-STRIP" is between two and three times faster than sodium bicarbonate. These tests were conducted side by side using a SB 400 soda blasting machine with a number 7 nozzle and a 285 compressor. These same tests also conclude that "K2-STRIP" will leave a slightly increased profile without pitting the metal. Although not recommended for use on fiberglass, plastic, aluminum or other soft substrates, this new media will allow for a significant reduction in the time required to remove coating off metals.

Another test concluded that "K2-STRIP" was as fast as #70 grit abrasive for removing paint and, unlike grit abrasives, does so without pitting the metal surface.

## APPLICATIONS

- Paint Removal**.....Removes paint and other coatings from aluminum, stainless steel, glass and chrome.
- Clean Parts**.....Will not damage threads, cast aluminum bearings and seals.
- Use in Hazardous Areas** .....Will not cause thermal sparks.
- Inspect Weld Seams**.....K-2 will not cause crack closure.
- Remove Dirt, Residue or Paint from Tank Interiors**.....K-2 is non-hazardous to workers, even in confined areas. Solubility of media allows for easy cleanup.
- Speed Up Turnarounds and Avoid Shutdowns**.....Other work may continue while K-2 is used.

**Replace Hand Cleaning** .....K-2 is faster, reduces manual labour.

**Remove Tar Buildup On Asphalt Shingle Equip.** .....Will not damage bearings or rollers.

**Remove Dirt, Barnacles & Paint From Steel Vessels** .....K-2 will not damage substrate and helps meet containment requirements.

To summarize “K2-STRIP” has several advantages over sodium bicarbonate when used to strip coatings off metal. Some of these advantages include:

- It leaves a slightly increased profile.
- It leaves no hard to remove residue.
- It greatly reduces blasting time.
- It reduces the amount of media required to remove coating(s).

## PHYSICAL PROPERTIES

Specific Gravity	2.66
Density	1363 – 1458 kgs/m <sup>3</sup> ( 85 – 91 lbs/ft <sup>3</sup> )

**\* Correct Air Pressure Is Always Required.**

K2-Strip is exclusively available through Target Products Ltd
